

Phase I: DNA/RNA std curve optimization

Step 1

Std curve
(manual)

Select stds for
96well plate

Step 2

Test using new
Turner method

Step 3

Implement in
prd

Phase II: DNA/RNA std curve optimization

Step 4

Purchase
384well
plates

Reduce
assay vol;
std curve
(manual)

Select stds
for 384 well
plate

Step 5

Set up
automated
method

Step 6

Implement
in prd/GLS
